DESCRIPTION (Continued)	<p>The Charles A. Woodward House has a two-bay gable-end facade with a gable roofed ell at the right rear of the house. A full-width one-story shed-roofed porch extends part way around the right side and has a pedimented peak centered over the right facade entry. The porch has square chamfered posts and small curved jigsawn braces. The two-tier railing has stickwork on the first level and taller splayed balusters forming round-arched openings beneath the plain rail. Windows are fitted with 2-over-2 sash; gable and cornice detailing is covered by modern siding.</p>		
SIGNIFICANCE	18 ARCHITECT	BUILDER	
	19 HISTORICAL OR ARCHITECTURAL IMPORTANCE		
	<p>Architecturally, the Charles A. Woodward House is significant as a good example of Victorian Vernacular architecture. Although much of the original detailing is obscured by modern siding, the unusually fine porch has an excellent selection of the ornamental woodwork made affordable by 19th-century advances in wood-forming technology. Another significant feature is the gable-and-ell plan (sometimes known as the "Homestead" plan), one of the 19th century's most durable house forms.</p>
